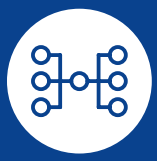
OUR PRINCIPLES
FOR AN EXTRACTION SYSTEM

Solutionorientated:
We don‘t see the problem, we find the solution.

Customer focus:
Together we develop suitable solutions, customised specifically for you.

Reliable products:
Performance and functionality take centre stage.

Sustainability:
Environmentally friendly production is important to us.



Qualified advice on site:
Our dealer network offers competent support.

Strong partners:
Benefit from the expertise of our partners in various areas.

Complete service:
We accompany you from consultation to maintenance.

Almost 30 years of experience:
We are the world market leader in filter and extraction technology.

Versatile in use:
Our products are suitable for all applications and industries.

Legal compliance:
We help you to comply with legal requirements.

Employee health:
Our solutions reduce the risk of dangerous long-term illnesses.

Employer attractiveness:
Clean workplaces are a basic requirement for basic equipment for skilled workers.

Employee motivation:
Healthy employees are more motivated.

Cost reduction:
Clean environments protect machines and reduce maintenance costs

MAKE YOUR WORKPLACE

THE CLEANEST PLACE IN THE WORLD

For almost 30 years, we have been ensuring healthy air wherever smoke and dust arise in the workplace. Whether in industry, laboratories or offices - there is always a solution for clean air. We develop a suitable concept together with our customers, because we are the special machine builders, the occupational safety professionals or simply #dieLuftreiniger.
